

Index to *ASTJ*, Volume 44

Feature articles

Aikenhead, G.S.	Many students cross cultural borders to learn science: Implications for teaching	44(4)	9
Beder, S.	The dioxin controversy: Spilling over into schools	44(4)	28
Bigum, C.	Boundaries, barriers and borders: Teaching science in a wired world	44(1)	13
Boulton, A., & Panizzon, D.	River regulation in Australia: Damned if you do ...	44(2)	15
Cook, A.	Using Hypotheticals for a Science, Technology and Society curriculum emphasis	44(3)	30
De Laeter, J.R., & Dekkers, J.	Biology enrolments in Australian secondary schools	44(1)	25
Haire, M.	Teachers' experiences with Measurement in Sport as a curriculum resource	44(2)	30
Jones, R.W.	Overcoming an all-too-common problem: Solving the mismatch between science curricula and assessment	44(3)	19
Mills, A.	Plotting the motion of the planets using Newton's gravitation equation	44(3)	25
Parisi, A., & Kimlin, M.	Measurement of reflected, total and diffuse solar erythral ultraviolet radiation	44(3)	9
Spender, D.	The knowledge society: The status of science education	44(4)	20
Stein, S.J.	Reflections on the development of a personal understanding of the key learning area, Technology	44(3)	13
Stevens, M., & Owens, C.	Gold - Its extraction and the environment: Experiences in Papua New Guinea	44(4)	13
Webster, R.	Astronomy on-line	44(2)	9
White, P.	Interactive cable TV in science distance education	44(1)	43
Wright, D.E.	Is new technology a hazard to our health? A case study of mobile phones	44(1)	30
Yip, D.Y.	A reliable and versatile design for investigating gaseous exchange	44(2)	35
Yip, D.Y. & Yung, B.H.	Providing meaningful contexts for scientific investigations	44(1)	35
Zatsepin, V.I., & Cross, R.T.	The Lysenko affair revisited: Teaching the social responsibility of science	44(2)	25

Science notes

Adams, P.	Mousing about: Monitoring effects of diet on mouse activity	44(3)	35
Ash, M., & Buchanan, J.	Working more scientifically in senior chemistry practical classes	44(2)	49
Clark, M.J.	Microscale titration in schools titration competition	44(2)	45
Clark, M.J.	Microscale electrolysis	44(3)	39
Clark, M.J.	Electrodes and gas collection apparatus for microscale production of gases	44(4)	40
Dawson, C.	Modelling states of matter and changes of state	44(2)	54
Gauld, C.	Colliding pendulums, conservation of momentum and Newton's third law	44(3)	37
Giins, I.	Using spreadsheets in astronomy	44(1)	52
Mann, M., & Treagust, D.	A pencil and paper instrument to diagnose students' conceptions of breathing, gas exchange and respiration	44(2)	55
Nathan, D.	Collaborative learning incorporating technology for year eight study of the living world: A cross-curricular approach	44(1)	51
Panizzon, D.	Demonstrating diffusion: Why the confusion?	44(4)	37
Rowland, M.	Native fish - For fun and profit	44(3)	36
Russell, D.	Use your own computer timer: Inertial balance and airtrack	44(1)	54
Russell, D.	Use your own computer timer: Measurements 'of mice and men'	44(2)	43
Saint-Smith, J.	More modelling with magnetic marbles	44(3)	40
Stubbs, M.H.	Capsula - An innovative approach to the teaching of science and technology	44(1)	48
Tulip, D., Taylor, N., & Green, S.	A technique to show the ageing of human skin as a result of exposure to the sun	44(1)	56
William, M., & Preston, C.	Using natural materials for educational toys: Examples from Ghana	44(3)	41

Research

Akatugba, A., & Wallace, J.	Students' understanding of upper and lower fixed points of a thermometer and its influence on their proportional reasoning	44(1)	59
Fisher, B.	Australian students' appreciation of the greenhouse effect and the ozone hole	44(3)	46
Fysh, R., & Lucas, K.B.	Science and religion: Acknowledging students' beliefs	44(2)	60
Henderson, D., & Fisher, D.	Assessing learning environments in senior science laboratories	44(4)	57
Michie, M.	Factors influencing secondary science teachers to organise and conduct field trips	44(4)	43
O'Toole, M.	Climbing the fence around science ideas	44(4)	51
